# HOW THE BOOTS ARE MADE

## DYNAMIC FLEX COMFORT

After rigorous research and testing, R.M. Williams has created and developed new Dynamic Flex Comfort Technology which is now available in the popular Craftsman style.

The Dynamic Flex Comfort Craftsman Boot features a combination leather and rubber sole for added flexibility and softness underfoot. The heel and tread of the sole feature textured rubber pads, ensuring maximum durability and longevity. Wearers will also experience heightened comfort with a removable foot bed featuring a heel cradle and an arch support.

Ideal for frequent travellers, the Dynamic Flex Comfort Craftsman Boot is fitted with a fibreglass 'airport friendly' shank. The shank is essential in reinforcing the shape of the boot and provides maximum stability for the wearer, without setting off airport security devices.

DYNAMIC FLEX COMFORT CRAFTSMAN, YEARLING		
	CHESTNUT	BLACK
REGULAR	G 3-13	G 3-13
WIDE	H 6-12	H 6-12

### NEW FEATURES INCLUDE:

- Removable lightweight rubber footbed insert with heel cradle and arch support for added comfort.
- Lightweight flexible cellulose insole board.
- Fibreglass airport friendly shank reinforces the shape of the boot and supports the arch.
- Combination leather and rubber sole provides maximum flexibility and outstanding durability.
